

PRODUCT CERTIFICATE

For: anti-C SUPER antigen antibody

Catalog Number:	138-A
Product Description:	Rho(C) IgM (human monoclonal)
Clone:	109
Specificity:	Rho(C) human antigen of the Rhesus system.
Origin:	Peripheral blood lymphocytes from hyperimmune anti-C donor transformed by Epstein-Barr virus. Stable heterohybridoma cell line was obtained by fusion of lymphoblastoid cell line with stable anti-C production with murine myeloma X63-Ag8-653
Purity:	Protein A purified.
Buffer/Composition:	0.3 M NaCl; 1.25 mM EDTA; 0.1% Na Azide
Concentration:	~ 1mg/ml
Application:	Blood group typing in direct agglutination tests. <ul style="list-style-type: none">• slide test• tube test• microplate test Immunochemical analysis of Rh antigens
Cross Reactivity:	No cross-reactivity with other Rhesus antigens.
Storage:	Long Term 4°C Short Term 4°C
Expiration Date:	Product is stable for 1 years at 4°C. Do not freeze.
Shipping:	Wet ice
