

PRODUCT CERTIFICATE

For: anti-N blood antigen antibody

Catalog Number:	145-A
Product Description:	anti-N IgG2b (murine monoclonal)
Clone:	DRF-8
Specificity:	N antigen (identical site on glycophorins A ^N and B).
Origin:	mouse hybridoma
Purity:	Protein A purified.
Buffer/Composition:	0.3 M NaCl; 1.25 mM EDTA; 0.1% Na azide
Concentration:	~ 1mg/ml; bulk amount available upon request.
Application:	Blood group typing, serological investigations in forensic medicine. Immunochemical investigations. <ul style="list-style-type: none">• slide test• tube test• microplate test
Cross Reactivity:	Weak cross-reaction with M antigen when the titer of reagent with NN red blood cells is more 1:256 in microplate test.
Storage:	Long Term 4°C Short Term 4°C
Expiration Date:	Product is stable for 2 years at 4°C. Do not freeze.
Shipping:	Wet ice
