

Biotin-Conjugated Rabbit anti-Mouse IgG (H+L)

CATALOG No.: 28167

IMMUNOGEN: Purified mouse IgG

HOST: Rabbit

SPECIFICITY: Affinity purified rabbit anti-mouse IgG (H+L) specific antibody is conjugated with Biotin. The antibody reacts with the heavy chains on mouse IgG and with light chains common to most mouse immunoglobulins. It has minimum cross-reaction to human serum proteins.

APPLICATION: This antibody can be used for Western blot. The working concentrations for specific applications should be determined by the investigator. The results might be affected by several factors, including antigen concentration, sensitivity of detection method, temperature and length of incubations, etc. The following concentration ranges are recommended starting points for this product.

Western blot: 1:5.000-1:10,000

STORAGE: Store at 2-8°C. For extended storage, add an equal volume of glycerol (ACS or better grade) and store at -20°C. Alternatively, the product may be aliquoted and frozen at -70°C or below, in absence of glycerol. Avoid repeated freezing and thawing.

For in vitro research use only.
