

KLF4 Polyclonal Antibody

CATALOG #:	3089-200
AMOUNT:	200 µg
LOT #:	_____
IMMUNOGEN:	Synthetic peptide surrounding amino acid 27 of rat KLF4
INTERNAL ID#:	BV-J92
HOST:	Rabbit
SPECIES REACTIVITY:	Human, Mouse, Rat

FORMULATION:

200 µg (0.5 mg/ml) affinity purified rabbit anti-KLF4 polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, 5 mM EDTA and 0.01% thimerosal.

STORAGE CONDITIONS:

Store at -20°C. For long term storage, aliquot and freeze at -70°C. Avoid repeated freeze/thaw cycles.

DESCRIPTION:

KLF4 belongs to the erythroid Kruppel-like factor (EKLF) family that is involved in the differentiation of epithelial cells and may also function in skeletal and kidney development. KLF4 can act as both a repressor and activator of transcription. KLF4 regulates the expression of key transcription factors during embryonic development and is important in maintaining embryonic stem cells. It also contributes to the down-regulation of p53/TP53 transcription.

APPLICATION AND USAGE:

The antibody can be used in Western Blot analysis (1 µg/ml). However, the optimal concentrations should be determined individually. Blocking peptide (Cat.# 3089BP-50) is available separately.

FOR RESEARCH USE ONLY! Not to be used on humans.
