

MAK10 Polyclonal Antibody

CATALOG #:	3134-100
AMOUNT:	100 µg
LOT #:	_____
IMMUNOGEN:	Synthetic peptide surrounding amino acid 201 of rat MAK10
INTERNAL ID#:	BV-J96
HOST:	Rabbit
SPECIES REACTIVITY:	Human, Rat

FORMULATION:

100 µg (0.5 mg/ml) affinity purified rabbit anti-MAK10 polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, 5 mM EDTA and 0.01% thimerosal.

STORAGE CONDITIONS:

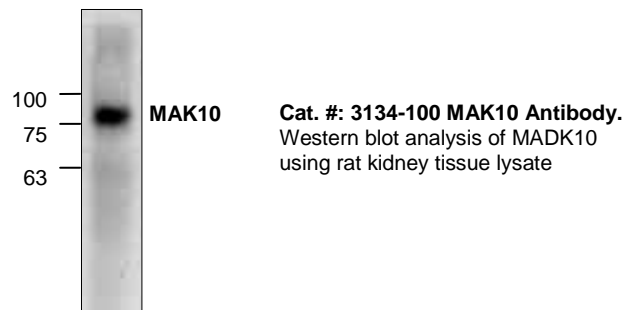

Store at -20°C. For long term storage, aliquot and freeze at -70°C. Avoid repeated freeze/thaw cycles.

DESCRIPTION:

MAK10 protein regulates the proliferation of smooth muscle cells. The mammalian homologue of yeast MAK10, also known as EGAP, is one subunit of a novel N-terminal acetyltransferase (NAT) that is highly conserved among vertebrate species. It is expressed in a variety of tissues in the developing rat embryo but restricted in expression in the adult, remaining detectable only in tissues undergoing continual cell renewal or in cells responding to pathological injury. The MAK10-NAT complex is an essential regulatory enzyme controlling the function of a subset of proteins required for embryonic growth control and vessel development.

APPLICATION AND USAGE:

The antibody can be used in Western Blot analysis (2-4 µg/ml). However, the optimal concentrations should be determined individually. Blocking peptide (Cat.# 3134BP-50) is available separately.

FOR RESEARCH USE ONLY! Not to be used on humans.
