

Akt3, Rabbit pAb

CATALOG #:	3164-100
AMOUNT:	100 µg
LOT #:	_____
HOST (ISOTYPE):	Rabbit (Ig)
IMMUNOGEN:	KLH conjugated synthetic peptide corresponding to amino acid residues surrounding T447 of human Akt3.
SPECIES REACTIVITY:	Human, (Mouse)

FORMULATION:

Purified rabbit polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

STORAGE CONDITIONS:

Maintain refrigerated at 2-8°C for up to 6 months or -20°C for long term storage.

BACKGROUND DESCRIPTION:

AKT3 is a member of the AKT, also called PKB, serine/threonine protein kinase family. AKT kinases are known to be regulators of cell signaling in response to insulin and growth factors. They are involved in a wide variety of biological processes including cell proliferation, differentiation, apoptosis, tumorigenesis, as well as glycogen synthesis and glucose uptake. This kinase has been shown to be stimulated by platelet-derived growth factor (PDGF), insulin, and insulin-like growth factor 1 (IGF1).

OTHER NAMES:

RAC-gamma serine/threonine-protein kinase; RAC-PK-gamma; Protein kinase Akt-3; Protein kinase B, gamma; PKB gamma; STK-2; AKT3.

SPECIFICITY:

The antibody detects a ~ 56 kDa band, corresponding to the expected molecular mass of Akt3 on immunoblots.

FOR RESEARCH USE ONLY! Not to be used on humans.

APPLICATION (suggested concentration):

The antibody can be used for ELISA (0.25 µg/ml), Western blotting (2.5 – 5 µg/ml).

APPLICATION DATA (Calculated MW = 55775 Da):

Western blot analysis of AKT3 (arrow) using rabbit polyclonal AKT3 Antibody (Cat.#3164-100). 293 cell lysates (2 ug/lane) either nontransfected (Lane 1) or transiently transfected with the AKT3 gene (Lane 2) (Origene Technologies)
