

## Stat2 Polyclonal Antibody

**CATALOG #:** 3468R-100

**AMOUNT:** 100 µg

**LOT #:** \_\_\_\_\_

**HOST:** Rabbit

**IMMUNOGEN:** Synthetic peptide surrounding amino acid 615 of rat Stat2 (ID# BV-B56)

**SPECIES REACTIVITY:** Human, Mouse, Rat

**FORMULATION:**  
100 µg (0.5 mg/ml) affinity purified rabbit polyclonal antibody in phosphate-buffered saline (PBS) containing 30% glycerol, 0.5% BSA, and 0.01% thimerosal.

### STORAGE CONDITIONS:

Store at -20°C. For long term storage, aliquot and freeze at -70°C. Avoid repeated freeze/thaw cycles.

### BACKGROUND:

Membrane receptor signaling by various ligands induces activation of Jak kinases which then leads to tyrosine phosphorylation of the various Stat transcription factors. Stat1 and Stat2 are induced by IFN- $\alpha$  and form a heterodimer which is part of the ISGF3 transcription factor complex. Although early reports indicate Stat3 activation by EGF and IL-6, it has been shown that Stat3 $\beta$  appears to be activated by both while Stat3 $\alpha$  is activated by EGF, but not by IL-6. Highest expression of Stat4 is seen in testis and myeloid cells. IL-12 has been identified as an activator of Stat4. Stat5 is activated by prolactin and by IL-3. Stat6 is involved in IL-4 activated signaling pathways.

### SPECIFICITY:

The antibody recognizes ~113 kDa of Stat2 from samples of human, mouse and rat origins. Reactivity to other species has not been determined.

### APPLICATION:

The antibody has been tested in Western blotting (0.5-4 µg/ml). However, the optimal concentrations should be determined individually. Blocking peptide (Cat.# 3468RBP-50) is available separately.

**Cat.#: 3468R-100**  
Western blot analysis of Stat2 expression in lysate from Jurkat cells (Lane 1, 2) and 3T3 cells (Lane 3).

**FOR RESEARCH USE ONLY! Not to be used on humans.**
