

# Lympholyte®-1.1

ACL5095

## DESCRIPTION:

Lympholyte®-1.1 is a density separation medium specifically designed for the isolation of islet cells from the pancreas.

## APPLICATIONS:

Lympholyte®-1.1 can be used undiluted to eliminate non-islet tissue such as exocrine fragments, lymph nodes, ganglia, ductal and vascular tissue from pancreatic cell suspension. The resulting cell population consists mainly of islet cells that may be expanded for use *in vivo*.

**PRESENTATION:** 500 ml sterile liquid.

**STORAGE/STABILITY:** Store at +2 to +28°C. Always store protected from light.

## SPECIFICATIONS:

<u>Composition:</u>	Ficoll 400 MW: 400 000 130 g/l Amidotrizoic acid (ATA) MW: 613.93 92.5 g/l NaOH to convert ATA into its salt form
<u>Density:</u>	1.100 ± 0.001 g/ml @ 25°C.
<u>pH:</u>	6.6
<u>Osmolality:</u>	0.341 Osmol/kg
