

Product:

Carbenicillin Disodium Salt Solution

Catalogue Number:

BIO-87026 10ml

Features

- Cost effective
- Ready-to-use solutions
- Time saving
- Stable at -20°C
- Solutions in ethanol can be used directly from the freezer
- Avoids handling of toxic or harmful substances
- No sterile filtration required

Applications

- Cell culture
- Plasmid selection
- Gene regulation

Description

Carbenicillin is an ampicillin analogue that inhibits bacterial cell wall synthesis, and is commonly used in place of ampicillin to reduce the production of satellite colonies. Carbenicillin is more stable than ampicillin at low pH, which usually arises during bacterial fermentation. Carbenicillin resistance is mediated by cleavage of the β -lactam ring by β -lactamase (*bla* gene).

Product Specifications**Batch No:**

See vial.

Storage Conditions:

Carbenicillin Solution can be stored at -20°C for 12 months. Carbenicillin Solution will remain stable if stored as specified.

Shipping Conditions:

On Blue Ice

Concentration:

100mg/ml in 50% Ethanol

CAS Number: 4800-94-6**Safety Precautions:**

This product is for R&D use only, not for human use, or any other use. Flammable. May cause sensitization by inhalation and skin contact. Please refer to the material safety data sheet for information regarding hazards and safe handling practice.

Xn: HARMFUL

F: FLAMMABLE
