

## HRP Conjugated Goat anti-Guinea Pig IgM

<b>Host</b>	Goat
<b>Catalog Number</b>	GM-60P
<b>Quantity</b>	1.0 mg
<b>Physical State</b>	Liquid
<b>Buffer</b>	50 mM HEPES pH 7.0, 0.15 M Sodium Chloride with 0.2% BSA
<b>Preservative</b>	0.01% Thimerosal
<b>Storage</b>	4 C

### Procedure

Goats were immunized with highly purified normal guinea pig IgM in Freund's adjuvant. The antiserum was solid phase absorbed to make it IgM mu chain specific and the anti-Guinea Pig IgM was isolated by solid phase immunoaffinity chromatography and conjugated with horseradish peroxidase.

### Specification

The affinity purified anti-Guinea Pig IgM antibodies only react with IgM by immunodiffusion, Immunoelectrophoretic and ELISA techniques.

**Western Blots** 0.5 - 0.1 ug/mL

**ELISA** 0.2 - 0.05 ug/mL

**Application** For Research and Manufacturing Only; Not for Use in Diagnostic Applications.
