

### Crude Lectin

Catalog Number: **L-7200-20**

Description: **Crude Cancer antennarius lectin (CCA) from California crab.**

Protein Concentration: 20 mg crude CCA / vial.

Activity: Shows agglutination when tested with human red blood cells.

Buffer: 0.05M Tris-0.1M NaCl-0.01M CaCl<sub>2</sub>, pH 7.2 containing 0.05% BSA.

Storage: Crude lectin may be stored frozen in the presence of 40% glycerol.

Stability: The lectin absorbs readily to glass and metal surfaces. For extended storage, it should be kept in a plastic container with the addition of BSA.

Caution: The aluminum seals have sharp edges and the vial itself may have cracks which can cause lacerations. Use caution when opening the vial.
