

DATA SHEET

Product: AF Cholesterol Assay Kit

Catalog No.: Z5030061

Shipping Condition: Dry ice

Storage Condition: Store reagents at -20°C.

Shelf Life: 6 months from the date of receipt under proper storage conditions

Description

CHOLESTEROL is a sterol and lipid present in the cell membranes, and is transported in the bloodstream of all animals. It is used to form cell membranes and hormones, and plays important roles in cell signaling processes. Elevated levels (hypercholesterolemia) have been associated with cardiovascular diseases such as atherosclerosis; whereas, low levels (hypocholesterolemia) may be linked to depression, cancer and cerebral hemorrhage.

Simple, direct and automation-ready procedures for measuring cholesterol are very desirable. BioChain's Cholesterol Assay uses a single Working Reagent that combines cholesterol ester hydrolysis, oxidation and color reaction in one step. The color intensity of the reaction product at 570nm or fluorescence intensity at $\lambda_{em}/\lambda_{ex} = 585/530\text{nm}$ is directly proportional to total cholesterol concentration in the sample.

Components

1. One Kit
2. User Manual
3. Certificate of Analysis
4. MSDS
